**IT TRAINING CLASSES APPROVED ON GSA SCHEDULE**

**ATLANTA, GA (June 7, 2019)** – Systems Atlanta, Inc. (SAI) is proud to announce the inclusion of IT certification courses to their Federal General Services Administration (GSA) Contract (GS-35F-0322Y). Government purchasers can now easily find available skills training courses on GSA Advantage along with SAI’s negotiated pricing rates thus streamlining the procurement process for quality training.

Using proven instructional system development methods, SAI training solutions are structured around blended learning techniques that incorporate lecture, computer-based training, discussion and hands-on training labs (when needed), ensuring each student has a clear and complete understanding of all course content.

Systems Atlanta has been a GSA Schedule contract holder since April, 2012 with their IDS5 training courses available for purchase. The ability to now offer CompTIA, Cisco, (ISC)2, ISACA and other certification courses that are of particular interest to personnel who have a need to meet specific requirements helps round out the Systems Atlanta portfolio of high-quality, just-in-time training.

Systems Atlanta training is available in-house at their Kennesaw, Georgia location and via customized on-site delivery solutions at client locations in both the commercial and government sector.

**About Systems Atlanta, Inc.**

Systems Atlanta, Inc. (SAI) provides comprehensive solutions and services to address the technology requirements of civilian, government, and military facilities. A pioneer in the Information Display Systems (IDS) industry, SAI has more than 35 years of experience developing and implementing IDS networks in diverse operational environments around the world. The company’s solutions include the widely-adopted and highly-customizable IDS5 product suite, network and software engineering, classroom and online training courses, technical support, project/program management, and other services designed to improve customers’ information access, situational awareness, responsiveness, and operational efficiencies.
